## OBJECTIVES AND STRUCTURE

### The way to innovation and growth

As part of its cluster policy, the Bavarian State Government supports the establishment of nationwide platforms in high-tech industries and traditional key sectors of the Bavarian economy. The central task of the cluster platforms is to interlink enterprises, i.e. to network companies and research institutes. The aims of the cluster platforms:

- Strengthen the value chains from research to the final product
- Promote competitiveness through cooperations
- Convert research results into new products and services
- Increase the overall innovation dynamics in Bavaria
